Professional Summary

Full-Stack Developer skilled in **Next.js, TypeScript, React.js, Node.js, PostgreSQL, MongoDB, Prisma, and Redis**, experienced in building scalable role-based platforms, real-time systems, secure APIs, and data-driven web applications. Strong foundation in **Data Structures and Algorithms** with **800+ LeetCode problems** solved and a **1700+ contest rating**.

Technical Skills

Languages: C, C++, JavaScript, TypeScript, SQL
Frontend: Next.js, React.js, Tailwind CSS, Redux Toolkit, TanStack Query, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, Socket.io, WebSockets, JWT Authentication
Databases: PostgreSQL, Prisma ORM, MongoDB, Mongoose, Redis, Geospatial Indexing
AI Integration: LangChain, Groq LLM, Llama 3.3 70B, Zod, PDF Processing
Tools & Core CS: Git, GitHub, Postman, Linux, Vercel, Render, DSA, OOP, DBMS, OS

Technical Projects

CampusHire – Campus Recruitment & Placement Platform [\[GitHub\]](#) [\[Demo\]](#)

Sep 2026 – Present

Next.js, TypeScript, PostgreSQL, Prisma, LangChain, Groq Llama 3.3 70B

- Built a full-stack recruitment platform with **4 role-based portals** for Students, Recruiters, Placement Officers, and Admins, supporting jobs, applications, eligibility, and placement workflows.
- Implemented real-time **Kanban application pipelines**, automated eligibility checks using **CGPA, branch, and batch**, and digital PDF offer releases to streamline the placement lifecycle.
- Integrated an **ATS resume matching engine** using LangChain and Groq Llama 3.3 70B to compare PDF resumes with dynamic job descriptions and generate structured skill-match scorecards and recommendations.
- Added PostgreSQL-based **ATS score caching** with Prisma and optimized resume processing using PDF extraction, semantic chunking, and Zod-validated LLM outputs to reduce redundant API calls.

Bus Booking Management Service [\[GitHub\]](#) [\[Demo\]](#)

Aug 2026 – Aug 2026

Next.js, TypeScript, Node.js, Redis, MongoDB, Socket.io

- Engineered a high-concurrency booking system using **Redis 5-minute TTL locks** to prevent double-booking and race conditions during checkout.
- Implemented real-time seat availability and lock-state synchronization using **Socket.io** across concurrent user sessions.
- Developed role-based Admin and Passenger workflows with dynamic, server-rendered booking interfaces using Next.js.

Local Service Management System [\[GitHub\]](#) [\[Demo\]](#)

May 2026 – Jun 2026

Next.js, TypeScript, Express.js, MongoDB, Razorpay

- Built a role-based service marketplace for **Admins, Providers, and Customers** with scalable full-stack workflows using Next.js and TypeScript.
- Implemented **MongoDB 2dsphere geospatial indexing** and aggregation pipelines for location-based provider discovery within dynamic radius ranges.
- Integrated Razorpay payments with secure transaction processing and webhook verification for service bookings.

Real-Time Chat Application (AURA)

Feb 2026 – Mar 2026

React.js, Node.js, Express.js, Socket.io, MongoDB

- Built an event-driven real-time messaging platform using **Socket.io** with one-to-one messaging, typing indicators, and online presence tracking.
- Implemented JWT authentication using **HTTP-only cookies** and secured protected API routes against common web security vulnerabilities.

Problem Solving & Achievements

Solved **800+ DSA problems** across LeetCode with a **1700+ contest rating**.

Earned the **LeetCode 500-Day Streak Badge** through consistent daily problem solving.

Strong proficiency in **Graphs, Dynamic Programming, and Space-Time Complexity Optimization**.

Education

Guru Ghasidas Central University

B.Tech in Computer Science and Engineering; CGPA: 8.64

Maharishi Vidya Mandir

Senior Secondary (12th): 93.0% | Secondary (10th): 89.0%

Bilaspur, India

2023 – Expected 2027

Sultanpur, UP, India

2020 – 2022

Leadership & Extracurricular

CP/DSA Team Lead

GeeksforGeeks Student Chapter, GGU

- Conducted weekly algorithmic problem-solving sessions and code reviews for **100+ university students**.

Aug 2025 – May 2026

Bilaspur, India
